EXOTIC PLANTS
 BIOLOGICAL SUPPLIES

TROPICAL ODDITIES
 SHELLS

This list is for those who like tropical plants and want nice specimens of rare plants for the house in winter and outdoors in summer. This enterprise is operated by people long familiar with tropical plants from around the world.

It is difficult to publish a permanent list of rare orchids and other plants because new things are always being discovered. Native plants come from remote places and often high water, snakes, alligators and other hazards interfere with prompt delivery, but when slow in filling an order, we put in an extra, besides the "surprise in every package". Always allow 15 days for shipping though we often ship in 3 days.

All prices indicate bare root unless otherwise stated. Orchids and Bromeliads do much better if taken on wood. This is the way they grow naturally.

No order for less than \$3.00 will be accepted because of increased postal rates. Old customers and repeat orders excepted. All orders postpaid East of the Mississippi River unless otherwise stated. ADD 10% WEST OF THE MISSISSIPPI AND CANADA. Packing and safe delivery guaranteed. All plants are blooming size and taken by permit. None are taken from the Everglades Park area. We do not ship C.O.D. It costs you more in fees, and some people never pick up the packages.

PLEASE LET US KNOW WHAT YOU THINK OF YOUR PLANTS IMMEDIATELY UPON RECEIPT, ESPECIALLY IF YOU HAVE A COMPLAINT. PLEASE READ THIS BULLETIN CAREFULLY - MANY PEOPLE DON'T, AND IT CAUSES NEEDLESS CORRESPONDENCE.

The culture of these plants is simple and of necessity our instructions are simple and to the point. In shipping plants everywhere we cannot state anything but a general and accepted practice. Though orchids and Bromeliads are tough plants and take much punishment, they react differently in different places. You must find the proper location on your premises. IF YOU HAVE NEVER GROWN ORCHIDS LET US KNOW WHEN YOU ORDER.

The old theory that it is difficult to grow orchids is not true, and there is no reason why you should do without them. There are so many types that one may enjoy them the year round - indoors and outside - at very little cost. At first, you can try your hand on the inexpensive wild varieties which we can supply. Among our customers are beginners, amateurs, professionals, advanced collectors and the most exacting connoisseurs. For the latter, we advise getting on our "special" list as there are new varieties-discovered and imported quite often.

ORCHIDS TERRESTRIAL

Terrestrial orchids grow in soil especially leaf mold and compost. The vanillas should be rooted or grown loosely potted. Use any or all of the following - best to mix two or three items, your choice - Spaghnum, dead leaves, leaf mold, compost, osmunda screenings, etc. To root cuttings, lay sideways on the medium and pull a little of it around each eye, when an eye starts to run pot in same

"A SURPRISE IN EVERY PACKAGE"

material and provide trellis. They like lots of water. Other terrestrials should be grown in compost and started in shade and as the bloom spike appears, gradually move to sun or very strong light. Set bulbs shallow with part of bulb showing, 3 or 4 bulbs to the pot are best. After bloom, store the bulbs as is, but keep slightly damp.

VANILLA PLANIFOLIA (fragrans). Vanilla extract comes from this orchid. Flowers 3 to 4 inches, greenish yellow, fragrant. Plant vine like, large thick leaves. \$1.25 per cutting of at least 2 eyes.

VANILLA GRANDIFLORA. Best of all - large whitish green flowers, cutting \$1.65.

BLETIA TUBEROSA. Lovely, palm leaf orchid with multiplying bulbs and loose panicles of many lavender blossoms on tall stems. After bloom, rest bulbs. Bulbs 35¢ each or 5 for \$1.25.

EULOPHIA ALTA (Platypus altus). Though Bletia is beautiful, this one is best. Many reddish purple flowers in racemes on tall erect stems. Bulbs 40¢ each or 5 for \$1.50.

ORCHIDS EPIPHYTIC

Epiphytic plants grow naturally on trees, logs and rocks with aerial or exposed roots. If bought growing on wood or tussock, they are much easier to handle. If bare root, pot in rotten wood, osmunda, or other loose material with charcoal and broken pottery in the bottom of the pot. Quick drainage is necessary and don't over water. Soak well then allow to dry out before watering again. Plants on wood need more water. Some of these plants like more light than others, but the light or sun in your locality is the determining factor. Very early or late sun is good, but filtered sun or passing sun and shade is best, as in a slat house.

These inexpensive native plants grow just like the fancy, large flowered types and so they are best for beginners. After learning, there is little gamble in buying the more expensive type. Many orchids do not look good when out of season or dormant, but that is the best time for shipping. DON'T THROW AWAY A DEAD LOOKING PLANT IF THE ROOTS ARE ALIVE.

CYRTOPODIUM PUNCTATUM (A curved foot that punctures). Bull's horn or cigar orchid. A mammoth of the orchid family, most robust orchid native of the United States. A real spray orchid with long spreading panicles of yellow, black and brown spotted blossoms, very showy even when not in bloom with large bulbs and palm like leaves. Easy to grow - January to April blooming.

Medium - - - - - \$ 5.00

Large - - - - - 10.00

Extra large - - - - - 25.00 Express collect

EPIDENDRUM TAMPENSE (Butterfly Orchid). We can't say enough for this rugged "spunky", ready blooming plant. The best for beginners and it wins the admiration of all orchidists. Takes punishment, will stand cold and some freezing. Small fragrant, yellowish green flowers with white and purple lips. Many blossoms in loose sprays which are good as cut flowers or corsages. Do not remove dead bulbs until plant is established.

5 to 8 strong bulbs - - - - - \$1.50 On wood - - - - - \$2.00

8 to 12 strong bulbs - - - - - 2.00 On wood - - - - - 2.50

Extra large plant - - - - - 5.00 On wood - - - - - 7.50

"A SURPRISE IN EVERY PACKAGE"

EPIDENDRUM COCHLEATUM called "Black Orchid" (var. Triandrum) - found only in south Florida. Lovely and easy to grow with attractive bulbs and foliage. May bloom any time with small blackish purple, shell like flowers in short sprays. Especially nice on tussock or wood. Hard to get. A real collector's item.

Small 4 to 6 bulbs - - - - -	\$1.75	On wood - - - - -	\$2.25
Medium 8 to 12 bulbs - - - - -	2.50	On wood - - - - -	3.00
Large 12 or more bulbs - - - - -	4.00	On wood - - - - -	4.50

EPIDENDRUM DIFFORME - Gentlemen's orchid fine for boutonniere. Very attractive, with rich green succulent leaves and many lovely greenish white flowers in clusters at the stem ends. May bloom anytime.

At least 3 nice stems - - - - -	\$1.00	On wood - - - - -	\$1.25
Medium - - - - -	1.50	On wood - - - - -	1.75
Large - - - - -	2.00	On wood - - - - -	2.25

EPIDENDRUM RIGIDUM - For beginners and collectors. Much like difforme with many stems and roots standing away from the wood. Not found in many places but very luxurient where found. Small yellow flowers in clusters. Price - same as difforme.

EPIDENDRUM NOCTURNUM - One of our best, with long stems and many roots. Very attractive when in leaf and bloom. Largest flowers of any native. Sepals and petals yellow, lip white with yellow spot. Very odd shaped and fragrant at night. Like some shade but strong light and humid atmosphere. As with E. Anceps is different from most orchids, they will often bloom more than once on the old green leafless stems with good tips, so do not remove until completely dead.

3 to 5 stems - - - - -	\$1.75	On wood.or bark - - - - -	\$2.25
5 to 8 stems - - - - -	2.25	On wood or bark - - - - -	2.75
Large - - - - -	5.00	On wood or bark - - - - -	5.50

EPIDENDRUM ANCEPS - Next to Cryptopodium our showiest orchid plant with many small yellow blossoms in heads. Much better on wood. Shade and humid condition necessary. Another good boutonniere orchid and often other interesting things growing with it on wood.

Price - same as E. Nocturnum.

EPIDENDRUM BOOTHIANUM - Small, odd, hard to get. Graceful narrow leaves and compact bulbs. They look like a stack of green nickels that fell over. Mixed color of sepals and petals green and yellow. April, May, June blooming. Get on waiting list.

4 to 6 bulbs - - - - -	\$2.00	8 to 10 bulbs - - - - -	\$2.75
------------------------	--------	-------------------------	--------

POLYSTACHYA LUTEOLA (minuta) - Small attractive rare plant, graceful leaves and many small flowers in terminal panicles, white turning yellow. March to November blooming.

Small - - - - -	\$1.50
Medium - - - - -	2.00
Large - - - - -	2.50

POLYRRHIZA LINDENII (Ghost Orchid) - A real oddity. No leaves or stems, only roots and large pure white blooms with long green tails. Every collector should have one. An excellent house plant if kept in humid condition. Spring, summer and fall blooming. Do not buy bare roots if you are a beginner. Much in demand and hard to get.

Bare roots - - - - -	\$.75	On wood - - - - -	\$2.75
----------------------	--------	-------------------	--------

BROMELIADS

Among the most attractive of house plants, especially if taken on wood. May bloom at any time and easier to grow than orchids. If the old plant dies, leave as is for awhile. They sucker at the base. Very attractive plants for porch and outdoors in summer. For something different, go in for these plants along with orchids. All Bromeliads are easy to grow from suckers or seeds. The small plants on twigs are dandy for dish gardens and terrariums.

Bromeliads belong to the pineapple family and most are epiphytes, growing like and along with orchids. Our Tillandsias with lovely bloom are a branch of the Bromeliads. If bare root, pot in loose material such as dead leaves, rotten wood or excelsior. Water sparingly but keep in humid atmosphere with water always in leaf cups.

TILLANDSIA FASCICULATA - Most popular large gray-green, stiff foliage with beautiful red flower bracts and blue flowers along the side.

Large - - - - -	\$1.25	On wood - - - - -	\$1.50
Specimen plants - - - - -	2.50	On wood - - - - -	2.75

TILLANDSIA UTRICULATA - Grow to be giants with long, soft, curly leaves and very long bloom spikes to 6 feet.

Small - - - - -	\$1.50
Medium (a large plant) - -	2.00
Large - - - - -	5.00

TILLANDSIA TENUIFOLIA - Very attractive, easy to handle. Leaves grass-like. Good in baskets and dish gardens.

Each - - - - -	\$.75	On wood - - - - -	\$1.00
----------------	--------	-------------------	--------

TILLANDSIA CIRCINNATA (Silver Queen)- Small attractive plants - excellent for dish gardens and other make-ups. On twigs or small branches - \$.35 each.

TILLANDSIA BALBISIANA - Prettiest of all with its long, graceful curly leaves and lovely blooms

Each - - - - -	\$1.00	On wood or twig - -	\$1.25
----------------	--------	---------------------	--------

TILLANDSIA ALOIFOLIA - A corkscrew shape, striped curly leaves. A toss up between this and Balbisiana as to which is prettiest.

Each - - - - -	\$1.00	On wood or twig - -	\$1.25
----------------	--------	---------------------	--------

TILLANDSIA VALENZUELANA - Soft and sometimes pink foliage with branching bloom.

Each - - - - -	\$1.00	On wood - - - - -	\$1.25
----------------	--------	-------------------	--------

TILLANDSIA RECURVATA - Resembles and is first cousin to T. Usenoides or Spanish Moss which is neither moss nor Spanish but a blooming plant. Cluster of many blooming size plants on twigs for dish gardens, aquariums and what nots.

Medium cluster - - - - -	\$.75	Large - - - - -	\$1.00
--------------------------	--------	-----------------	--------

At times we get rare Tillandsia pruinosa, catopsis nutans, and guzmanias.

For dish gardens and make ups, we offer the following Tillandsias, baby size, at \$1.00 per dozen:

T. fasciculata, balbisiana, tenuifolia, circinnata and Aloifolia.

All the same kind or mixed. Our choice.

"A SURPRISE IN EVERY PACKAGE"

SPECIAL COLLECTION OFFER - Our choice.

Five blooming size Tillandsia, all nice plants - only \$4.00

OSMUNDA - for potting orchids and Bromeliads. 2 lbs. will pot 6 orchid plants in 6" pots (average). Clean and light. 60¢ per lb. Postpaid east of the Mississippi - add 10¢ per lb. west of the Mississippi. 100 lbs. or more 45¢ per lb. Railway freight collect.

Ozark Gardens Magazine - good reading for plant lovers. Excellent, inexpensive and a lasting gift for relatives and friends. Read our articles every month about orchids, rare plants and adventures in the big swamps - \$2.00 per year. Send money to Ozark Gardens, Eureka Springs, Arkansas.

OTHER INTERESTING PLANTS AND THINGS

One of the most beautiful and exotic sights to a plant lover is the entrance into a "cypress dome" or swamp of the deep Everglades. At first sparse,, the growth gradually becomes more dense, then suddenly one steps into a low area, which in wet times would require deep wading. The limbs of the trees are covered with plant life, the abundance of each item depending upon the particular swamp. There will be orchids, in variety, some rare and hard to spot, air plants or bromeliads, moss, ferns and lichens. If you have been very quiet you will see much bird and animal life. Yes, alligators. If noisy, all fade from sight and leave you alone in a beautiful but silent cathedral.

POLYPODIUM INCANUM - The true resurrection fern - not the desert fern. Curls up when dry - wet and it comes to life. Ideal house plant especially with flower arrangements. Large tussocks often with other plants \$1.50.

FICUS AUREA - Golden fig, strangler fig, banyan tree. Makes very fine fast-growing house plants with shiny leaves. Small trees 2 to 3 feet cut back for shipping - \$1.50. This plant is fine for BON SAI, or the Japanese art of dwarfing trees in pots.

BANANA SPROUTS - One of the best and easiest house plants, and will grow to big plants outdoors in summer. Very fast grower in good soil with much water. Sprouts cut back for shipping -
12 to 18 inches - - - - - \$1.50 18 to 26 inches - - - - - \$2.00

Do you like palms? Don't miss this. ADONIDIA MERRILLII (Christmas or dwarf royal palm) Beauties - 8 to 12 inches, seedlings from beds 50¢ each or 3 for \$1.25.

BRYOPHYLLUM PINNATA - Also called "Leaf of life", "Live forever" and "Chinese lantern". You can have fun with this easy to grow house plant. Pull off a leaf and lay it on the table. As the leaf withers, little plants form around edges. Two sizes, both nice plants - \$1.00 and \$1.50 each.

TRADESCANTIA ERECTA (Rhoeo discolor) - Moses-in-the-Bullrushes or Twelve Apostles. A real beauty. The erect leaves in rosettes are rich red beneath and rich green above. Striking, and easy to grow. Fine plants - \$1.00 and \$1.50 each.

JATROPHA MULTIFIDA (Many fingers) - Is also called "Coral plant" because of its many brilliant flowers in umbels, and physic nut because the fruit is highly laxative. Not poison, but do not taste the fruit. Makes very unusual and attractive house plant. To 12 inches or more - \$1.50.

HYBRID ORCHIDS

We have available eight varieties of Cattleya crosses. The divisions and full plants are all heavy and have bloomed many times. No seedlings. All have at least one Cattleya trianae parent.

All the blossoms are large, and the colors range from light to deep lavender. Sepals, petals and throats have color variations with green, yellow and white.

The choice is ours so that we can select plants nearest bloom at time of your order. You may request plants for later, or variation of bloom time.

Heavy divisions - \$5.00. Full division - \$10.00. Large, untouched plants in pots and ready for division and repotting - \$20.00. Extra large - \$25.00.

When trimming the divisions we get nice "back bulbs", which are easy to start with possible bloom in 6 to 12 months. Some old time collectors buy nothing but back bulbs.

Two or more such bulbs to the cluster are \$1.50 and \$2.00.

IMPORTED ORCHIDS

All these plants are shipped bare root, healthy and full blooming size; fresh from their native jungles.

They are not so pretty as nursery grown plants, but tougher and bloom better the first year or so in captivity.

All imported orchids must go through the U. S. Government Plant Quarantine gas chambers. It often causes some or all of the leaves to fall, but does no damage to the plants. Bulbs eventually lose their leaves anyway, though new growth and bloom comes from the base of the bulbs.

We keep most of these plants on hand but when we run short from heavy sales, we order more. Even though they come in by air it often takes the dealer a little time to collect plants before shipping, so please be patient.

CATTLEYA SKINNERI - Flowers, rose purple with 2 or more 3 to 4 inch bloom to the spike. Popular because it may bloom any time and often blooms 2 and 3 times per year. \$3.50 to \$5.00.

CATTLEYA AURENTIACA - 3 or more 3 inch orange and purple flowers - Fall and Winter bloom. \$3.50 to \$5.00.

CATTLEYA BOWRINGIANA - One of the best. Many 3 to 4 inch rose, purple flowers to the stem. Fall bloom. \$3.50 to \$5.00.

ONCIDIUM CARTHAGENENSE A real spray orchid - many flowers, yellow, brown and lavender on long stems. Summer and Fall blooms. \$3.50 and \$4.50.

ONCIDIUM WENTWORTHIANUM - Another fine long spray - many yellow 1 to 2 inch flowers. Summer and Fall blooms. \$2.50 and \$3.50.

"A SURPRISE IN EVERY PACKAGE"

ONCIDIUM SPLENDIDUM - Yellow flowers 3 inches in sprays. Attractive plants, one of the very best "oncies". \$3.50 and \$5.00.

ONCIDIUM ORNITHORHYNCHUM - It means the flowers are shaped like a bird's beak. Many one inch rose-lilac flowers in sprays. \$2.50 and \$3.50.

ONCIDIUM CAVENDISHIANUM - Beautiful sprays. \$3.50 to \$5.00.

ONCIDIUM CEBOLLETA - Very attractive with terete or round leaves and one to two inch yellow and brown blossoms. \$2.50 and \$3.50.

ONCIDIUM OBLONGATUM - Fine plants and as usual the flowers are in sprays and spotted yellow and brown. \$3.50 and \$5.00.

BRASSIA MACULATA - New to us, but unusual. \$3.50.

BRASSIA VERRUCOSA - Same as above.

BRASSIA CAUDATA - An attractive plant like E. Cochleatum. Flowers yellow and brown in racemes, several, one to two inch. \$2.50 to \$3.50.

EPIDENDRUM PENTOTIS - Like most of the other Epidendrums they are easy to grow and make fine plants. Many flowers on long spikes. \$3.50 and \$5.00.

EPIDENDRUM ARTROPURPUREUM - Is considered by most as the finest of Epidendrums. Many green and brown 3 inch flowers in sprays. \$3.50 and \$5.00.

EPIDENDRUM CARPARTIANUM - As with the other epidendrums it is tough. Many blooms any time. \$3.50.

EPIDENDRUM BRASSAVOLAE - Many 3 to 4 inch yellow flowers in Spring and Summer. A dandy plant that looks like Cattleyas. \$3.50 and \$5.00.

EPIDENDRUM STAMFORDIANUM - - Many yellow blossoms huddled together on a fairly long spike. You will like it. \$3.50.

EPIDENDRUM CILIARE - Has several 3 to 4 inch white fragrant flowers. Easy to grow. \$3.50 and \$5.00.

EPIDENDRUM AROMATICUM - Spring and Summer bloom in sprays, white fragrant and popular. \$3.50 and \$4.00.

LAELIA ACUMINATA ROSEA - Laelias are among the easiest and finest orchids, closely related to Cattleyas. Flowers 4 to 5 to stems. Rose-purple blooms - Spring. \$3.00 and \$4.00.

LAELIA SUPERBIENS - Large rose purple flowers, 4 to 5 to stems. Summer and Fall bloom. A must for those who like good orchids. \$5.00 and \$7.50.

CYNOCHES CHLOROCHILON - This is one of the most unusual orchids. Large bulbs and long bloom spikes curved like a swan neck so it is called "Swan Orchid". Flowers up to 10, 4 to 6 inches. Yellow and green. Spring and Fall - easy to grow. \$5.00.

CYNOCHES VENTRICOSUM - Another dandy with many large flowers. They are a puzzle to botanists because they produce bisexual or complete flowers. Male and female flowers and no one ever knows what color the flowers will be. Sometimes yellow, then black and other variations. Your guess. \$5.00 and \$7.50.

BRASSAVOLA NODOSA - 2 to 3 inch white flowers. Plant attractive and easy to grow. Might bloom anytime. \$2.50.

BRASSAVOLA CUCULLATA - Another new one. \$3.50.

BRASSAVOLA GLAUCA - As with B. Nodosa flowers are white, fragrant, but larger. One or two flowers on a stem. \$3.50.

ODONTOGLOSSUM GRANDE - 4 to 7 yellow 5 to 7 inch yellow flowers. Blooms in Autumn. Will stand warmer weather than other "Odonts". \$5.00.

STANHOPEA OCULATA - This is another lightly desirable basket orchid. Not only for many light yellow blossoms but it is fragrant. May bloom anytime. \$5.00. Back bulbs - \$2.50.

STANHOPEA WARDII - Lovely pendulous, basket orchid, 3 to 7 golden yellow flowers, 4 to 7 inches. Hard to beat. Summer and early Fall. \$3.50 and \$5.00.

STANHOPEA ECORNUTA - Another fine basket orchid. Flowers are cream white and large. Be sure to add it to your collection. \$3.50 and \$5.00. For Stanhopeas use wide slatted wooden or chicken wire baskets.

TRICHOPILIA TORTILIS - Another beauty. Flowers pale rose, 4 to 5 inches. One flower to each stem. \$3.50.

CATESETUM SCURRA - A strange plant with greenish-white blooms that hang down in ropes, close together, like a little girl's pig tails. Hard to get. \$5.00.

CATESETUM INTEGERRIMA - Plants look like C. Scurra but the white yellow tipped, bell shaped blooms are on a long fairly erect stem to which they are attached by short stems. Several flowers anytime. \$3.50.

Many collectors buy "back bulbs" and are therefore able to build up a wide variety at low cost. They are easy to grow even if some don't have leaves because new growth and bloom comes from the base of old bulbs and the plants bloom at next bloom time if properly handled.

We can't give a permanent list because it varies but there will always be cattleya species, oncidiums, epidendrums and laelias. The prices are from \$1.00 to \$2.00 depending on species and size of division. Collectors specify what they would like but allow for substitutes which is best.

SPECIAL COLLECTION LIST

After many attempts we have been able to find a reasonable supply of the hard to get lilliputs, or miniature orchids, so much in demand for collectors and those who have wardian cases or small spaces for orchids.

The following plants are new to us so we can't tell you about the blooming time or color but we do know that all are interesting and the same is true of the plants.

Be sure to order fast else you may have to wait a few days for more plants to come in.

MAXILLARIA VARIABILIS - Most attractive and different with its peculiar bulb and leaf arrangement. Apparently a heavy bloomer.

MEIRACYLLUM TRINASUTUM - Our choice for looks with its rich green, almost round and flat leaves. Easy to tell they grow on trees like ivy clinging to a wall.

COMPARETIA FALCATA - Another attractive plant and fairly large with long leaves, apparently has long bloom spikes.

ONCIDIUM CRISTA-GALLEY - These plants are very small but the flowers are large in proportion. Yellow with brown lip. They are really lilliputs like oncidium variegatum which can be pinned on and worn while in bloom. We will soon have more oncidiums variegatum.

ONCIDIUM PUSILLUM. - Another cutie.

EPIDENDRUM BRACKETENSE - Has very small onion like bulbs. As with most lilliputs, the blooms are small but lovely.

EPIDENDRUM ALBUM - Another cutie like Compertia Falcata. Many small flowers in sprays.

EPIDENDRUM MICROCHARIA - A new one.

IONOPSIS UTRICULARIOIDES - The small plants are nice and we couldn't help some one giving it that terrible name, but the blue flowers on very long spikes are lovely.

Any of the lilliputs are \$1.50 each. Six for \$8.00.

We will be introducing more and more orchids in the future, both popular, well known species as well as innovations to the general American orchid fancier. The list will go out exclusively to orchid lovers so be sure to let us know if you want your name on the list.

TRICHOCENTRUM CANDIDUM
ORNITHO CEPHALUS BICORNIS
ORNITHO CEPHALUS IRIDIFOLIUM
PLEUROTHALLIS MINIMA
PLEUROTHALLIS SPECIES

All the above are new to us.
